

Classification Tab (Third Party)

Purpose

- **Allows the user to view or modify the classification assigned to a third party (supplier, carrier, or recipient).**
 - **Classification helps in organizing third parties for reporting, filtering, or applying specific warehouse rules.**
-

Key Functions

1. View classification

- **Displays all the families or categories to which the third party belongs.**
- **Example: Supplier classification → “Preferred”, “Standard”, “New”.**

2. Modify classification

- **Using the contextual menu, you can:**
 - **Add an assignment → Assign the third party to a new classification or category.**
 - **Remove an assignment → Unlink the third party from an existing classification.**
-

Usage Notes

- **Classification affects:**
 - **Filtering and searching third parties in lists.**
 - **Selection criteria in orders, receipts, and other processes.**
 - **Reporting and statistics for warehouse management.**
- **For detailed structure, refer to the Classification chapter in SpeedWMS documentation.**
