

Comment Codes

Purpose

- **Define standard comments to be used during radio frequency operations (preparations, picking, etc.).**
 - **Allow for quick input by scanning a code instead of typing the full comment.**
-

How It Works

- **Each comment is linked to a unique code.**
 - **Scanning the code during a radio transaction automatically adds the comment description to the document.**
-

Example

- **Code: FRAGILE**
 - **Effect: When scanned, adds the comment “FRAGILE” on the shipment label for the current order.**
-

This ensures consistency and speeds up warehouse operations by avoiding manual typing of frequently used comments.
