

Country Management

Access

- **Menu: Settings → Third p. → Country**
-

Purpose

- **Mainly used for transport management**
 - **Allows configuring and declaring a list of countries in SpeedWMS**
-

Available Actions

- 1. Create new country codes**
 - 2. Modify existing country properties**
 - 3. Delete existing country codes (subject to constraints)**
-

Country Form Fields

Field	Description
Country code	Unique identifier for the country, alphanumeric, max 6 characters
Country name	Full name of the country, max 50 characters
Language	Country language code, max 5 characters
Belongs to EU	Checkbox to indicate if the country is part of the European Union

- **Notes:**
 - **The Language and EU membership fields can influence:**
 - **Automatic document printing language**
 - **Type of document to print based on whether the country belongs to the EU or not**
-

This is a simple but essential configuration for transport and document automation in SpeedWMS.
