

SpeedWMS Ergonomics & User-Friendliness

SpeedWMS is designed with ergonomics and ease of use as core principles. Users can:

1. Display & Personalization

- **Configure which information is shown on list screens.**
- **Customize column titles for clarity.**

2. Printing & Editions

- **Select from a list of available document editions.**
- **Create activity-specific editions if required.**
- **Modify personal edition templates (for trained users).**

3. Filtering & Queries

- **Apply filters to screens to quickly find information.**
- **Build custom queries for specific operational needs.**

4. Data Export & Import

- **Export screen content to Excel, XML, or Word.**
- **Import data from Excel or CSV files.**

5. Communication

- **Send emails directly from the interface.**
- **Initiate phone calls to contacts from screens (e.g., receipts, order entry).**

Essentially, SpeedWMS empowers users to adapt screens, reports, and interactions to their workflows, making operations faster and reducing errors.
