

SpeedWMS Glossary

Term	Explanation
Activity	Concept to separate management within the same warehouse for multiple activities, trades, or customers. Elements linked to an activity include: items, thirds, receptions, orders, and rules for receiving, storage, and preparation processes.
CAB	Bar codes.
Classification	Hierarchical organization of items or third parties, up to 999 families, with up to 5 tree levels. Example – Item classification: - Level 1: “Family” — Level 2: Consumer articles — Level 3: Catalog items / Other items — Level 2: Professional articles — Level 3: Items type 1 → Level 4: Items type 1.1 — Level 3: Items type 2 Level 1: Classification “Dangerous” — Level 2: Safe / Dangerous — Level 3: Toxic / Mortal Uses: Statistics, preparation mission criteria, specific programs (editions, etc.)
Installation Key	A 3-character code linked to a location or group of locations. Present on location labels. Used in radiofrequency procedures to validate movements.
DFAB	Manufacturing date (Manuf. Date).
DLC	Use By Date (UBD).
DLUO	Best Before Date (BBD).
DLV	Sale By Date (SBD).
Mission	Grouping of direct sampling lines. Types include preparation missions and picking replenishment missions.
Item Management Mode	Defines rules for traceability, stock rotation, and handling of each item.

Term	Explanation
	Example: Item managed with UBD → stock rotation first by UBD, then by date of entry. Tracks all changes for an item in stock (receipt, put away, quantity/location change, out of stock, etc.). Each movement has: - Unique movement number - Operation number - Transaction number - User code - Date/time - Movement-specific info
Stock Movements	
Sampling	Picking a given quantity of an item from a location. Each direct sampling corresponds to a mission line.
Quality	Nature of goods in stock (e.g., Standard, Second choice, Derated, Anomaly). Defined per activity.
SPCB	Sub-packaging indicator in a package. Example: A package containing 2 SPCBs of 12 units each.
Support	All goods in stock are placed on a support, identified by a unique number.
Third	Actors in the warehouse: Providers, Recipients, Carriers, Contacts.
Traceability	Information tracking the history of a stock line. Criteria include: date of entry, UBD, SBD, BBD, Manuf. Date, and up to 3 batches (Batch1, Batch2, Batch3).
Wave	Grouping of multiple sales orders for simultaneous preparation.
Stock Unit (SU)	Different packaging levels of an item (unit, pack, parcel, layer, pallet). Each SU can have: - Packaging code (carton, box, canister) - Weight - Volume - One or more identifiers - Constituted from lower-level SUs (e.g., a parcel = 48 units)
