

SpeedWMS – Import of Expected Items

Purpose:

- Enables bulk import of expected items into the Receiving → Expected module.
 - Streamlines the creation of expected lines from an external Excel file.
-

Access:

- Menu: Receiving → Expected → Import
-

Process:

1. Click the Import button to start the process.
 2. Select an existing Excel file containing the expected items.
 3. SpeedWMS will read the file and display the expected items ready for import.
-

Post-Import:

- Imported expected items are added to the system and can be modified or processed as needed.
- The import ensures consistency with existing purchase orders or return processes.
