

SpeedWMS – Import Thirds

Purpose:

- **Allows importing third-party records into SpeedWMS, including Suppliers, Carriers, and Recipients.**
 - **Streamlines mass creation or update of third-party data.**
-

Access:

- **Menu: Settings → Thirds → Import**
-

Process:

- 1. Click Import, then Browse to select the file to import.**
- 2. File format is the same for all third-party types: Suppliers, Carriers, or Recipients.**
- 3. Include a mandatory column “Type of Third” in the import file:**
 - **001 → Supplier**
 - **002 → Carrier**
 - **003 → Recipient**

Multiple types can be imported in the same file.

Steps in SpeedWMS:

- 1. Data Tab: Displays the imported file information.**
- 2. Settings Tab: Map column headers and define mandatory vs. optional fields.**
- 3. Insight Tab: Preview how the data will appear in Speed.**
- 4. Template Management:**
 - **Save template for reuse.**
 - **Saving as a model is requested at the end of the import.**
- 5. Finalize Import:**
 - **Cancel → abort import**
 - **Import → complete import**

Post-Import:

- **New thirds are added to the appropriate third-party table.**
- **Additional data can be manually completed for each imported third party.**
- **The process is identical for Suppliers, Carriers, and Recipients.**
