

SpeedWMS – Location Deallocation

Purpose:

- **Allows the removal of locations from a zone at any time.**
 - **Useful when reorganizing warehouse zones or updating location assignments.**
-

Steps to Deallocate Locations:

- 1. Select the location(s) to be removed from the zone.**
- 2. Right-click on the selection.**
- 3. Choose “Deallocate location” from the contextual menu.**

The selected locations will be removed from the assigned zone immediately.

Notes:

- **This operation only affects the zone assignment, not the location itself.**
- **Deallocated locations can be reassigned later to the same or a different zone if needed.**
