

SpeedWMS – Management of Expected Receptions

Access:

- **Menu: Receiving → Expected**
 - **Global settings: System → Global → Module → Expected**
-

Purpose:

- **Provides a view of all expected reception lines integrated into SpeedWMS.**
 - **Allows management of expected receptions from purchase orders or returned goods.**
-

Expected Reception Lines:

- **Each line represents a quantity of an item awaiting receipt in the warehouse.**
 - **Associated with a supplier purchase order or order-giver reference and a planned date.**
 - **Quantity consumed on an expected line corresponds to the quantity actually received.**
 - **Consumption is registered only when a stock movement is recorded in Speed.**
-

Display Options:

- 1. Headers view – shows expected items at header level.**
- 2. Portfolio view – shows all expected item lines.**

Users can configure the default display in System → Global → Module → Expected.

Actions Available:

- **Create new expected receipt lines manually.**
- **Modify existing lines individually or in bulk.**
- **Import expected reception lines from an Excel file.**
- **Delete existing lines (with constraints).**

- **Initiate reception – associate selected lines with a SpeedWMS receipt via the contextual menu.**
