

SpeedWMS – Photo Tab

Purpose:

Enable the association of images with items to improve identification and visualization within the system.

1. Functionality

- **The Photo tab allows users to attach an image to an item sheet.**
 - **To add an image:**
 1. **Click the “Select an image” button.**
 2. **Browse and select the desired image file.**
 - **Supported file types: All standard image formats accepted by SpeedWMS.**
-

2. Use Cases

- **Images can be displayed in the stock display screen for each reference.**
 - **Improves identification and verification of items during:**
 - **Receiving**
 - **Picking**
 - **Inventory management**
-

3. Notes

- **The image is linked directly to the item and will be displayed wherever item references appear in the system.**
- **No additional configuration is required after the image is selected and saved.**
