

Shipping Address Tab – RAG-Friendly Version

Purpose:

The Shipping Address Tab stores contact and address information for a third party. It enables the management of multiple addresses beyond the primary one, such as additional delivery addresses or billing addresses.

1. Key Capabilities

- **Maintain multiple addresses for a single third party.**
 - **Use addresses for:**
 - **Document generation (delivery notes, invoices, etc.)**
 - **Order preparation and logistics operations**
 - **Quick access to the address portfolio via the envelope icon in SpeedWMS.**
-

2. Usage Notes

- **Each address entry can include standard contact details (street, city, postal code, etc.) and can be designated for specific functions (delivery, billing, etc.).**
- **Ensures accurate routing of shipments and correspondence.**
- **Integrates with other SpeedWMS modules, supporting automation in order handling and reporting.**
