

Thirds Miscellaneous Tab – RAG-Friendly Version

Purpose:

The Miscellaneous Tab allows associating additional, non-standard information with a third party. This can include administrative, financial, or operational data that is not captured in the main third-party fields.

1. Key Capabilities

Depending on the type of third party, the Miscellaneous tab can store:

- **Supplier:**
 - **VAT numbers, star codes, ownership information, or other compliance details.**
 - **Recipient:**
 - **Special delivery instructions, account references, or other operational notes.**
 - **Carrier / Site:**
 - **Loading/unloading locations, transport hub identifiers, or site-specific information.**
-

2. Usage Notes

- **Fields in this tab are optional but recommended when additional information is required for logistics, accounting, or legal compliance.**
- **Allows the system to capture extended attributes for a third party without altering the standard tabs.**
- **Enhances reporting, validation, and integration with other modules such as transport planning or stock management.**
