

## **Thirds Tab – RAG-Friendly Version**

### **Purpose:**

The Thirds Tab allows linking an item (article) to additional third parties beyond the main supplier defined on the item sheet. This ensures that items can be tracked and referenced correctly for multiple suppliers or partners.

---

### **1. Default Behavior**

- The main supplier of the item is automatically listed by default.
- 

### **2. Contextual Menu Options**

The contextual menu allows the user to:

- Add an assignment to another third party
  - Define the following for the new third-party link:
    - Code – Unique identifier of the third party
    - Label – Reference name of the item for this third party
    - Identifier – Specific reference under which this item is known to the third party
- 

### **3. Usage**

- Useful when a single item is supplied or referenced by multiple third parties.
- Ensures accurate tracking of items per supplier and avoids errors in procurement, stock management, or reporting.
