Picking details - To prepare

Item = Load
Recipient = Shipping
Order no.: DN
Mission number Support No.

View : Default view

Act.	Mission line identifier	Mission number	Item code	Preparation reference number	Numero vague	Loading code	Loading date	Del.note no.:
	78	47	G5054182	3	2			0
	79	47	G5054182	3	2			0

This feature allows you to view all the picking in progress, classify them and assign them various shipping items. It is used for maintenance operations, and not recommended for operational processes.

In particular, it allows you to control:

- .The content of an order, a mission, a support etc.
- .The status of an order, a mission, a support etc.

These direct debits have a changing status, corresponding to the different tabs available in the window:

- .To prepare: the samples are generated and are to be prepared; status 010
- .Prepared: samples are taken. The stock issue has been carried out; status 040
- .Pre-shipped: the samples are packed; status 060
- .Shipped: samples are shipped; status 070
- .Terminated: direct debits are balanced; status 050
