

Shipment packing

Access : *Shipping / Shipment packing*

This feature allows to display the list of prepared supports for a mission, and to control each of the supports. It will then be possible to:

- Scan each of the mission supports
- Select a carrier
- Enter the packaging code associated with each support
- Operate a weight control. The system allows the configuration of a balance.
- Create new supports
- Edit labels

Identifier

The weight control can be configured at the level of the *System / Global configuration / Module Packing*:
