

Project: L'ORÉAL

Feature: Dock Guidance During Forklift Put-Away of Prepared Supports

Specification: SPD31

Version: 1.0

Date: 26/06/2025

Author: ZBA

◆ **DOCUMENT METADATA (for Vector DB)**

```
{  
  "document_type": "Technical Specification",  
  "project": "L'OREAL",  
  "system": "Speed WMS",  
  "module": "Forklift Put-away (Cariste Rangement)",  
  "feature": "Dock Display for Prepared Supports",  
  "spec_code": "SPD31",  
  "object": "Prepared Support",  
  "related_object": "Loading Dock",  
  "version": "1.0"  
}
```

◆ **SECTION 1 — Business Context / Functional Need**

1.1 Current Process

Within the L'Oréal project:

- 1. Orders are prepared.**
- 2. Supports are finalized.**
- 3. Finalized supports must be placed in a dock area waiting for loading.**

Operators use the module:

Forklift Put-away (Cariste Rangement)

to store prepared supports.

1.2 Current Limitation

Today, when the operator scans (flashes) a prepared support in the forklift put-away module:

- ✗ Speed does NOT guide the operator to the correct loading dock
- ✗ No indication is given regarding the dock associated with the order

As a result:

- Operators may place supports in incorrect docks
 - Loading preparation becomes less reliable
-

1.3 Requested Evolution

Implement a custom entry point (PE) in the Forklift Put-away module so that:

When a prepared support is scanned:

→ Speed displays the loading dock associated with the order linked to that support.

◆ SECTION 2 — Functional Behavior

★ SPECIFIC – SPD31

Trigger

When scanning a prepared support in the forklift put-away module.

Case 1 — Order Associated with a Loading

If the order linked to the scanned support:

- Is associated with a loading
- And that loading has an assigned dock

System Behavior

IF support.status = PREPARED

AND order.loading_dock IS NOT NULL

THEN

DISPLAY loading_dock AS suggested put-away location

ENDIF

Speed must:

- **Display the loading dock**
- **Propose it as the storage location**
- **Guide the operator accordingly**

Case 2 — Order NOT Associated with a Loading

If:

- **The order has no associated loading**
- **Or no dock is defined**

System Behavior

IF order.loading_dock IS NULL

THEN

STANDARD SPEED BEHAVIOR

DISPLAY POPUP: "No dock associated."

ENDIF

Meaning:

- **Standard put-away logic applies**
- **A pop-up informs the operator:**

No dock associated.

◆ SECTION 3 — Process Flow

- 1. Operator selects forklift put-away module.**
- 2. Operator scans prepared support.**
- 3. System retrieves:**

- **Linked order**
- **Associated loading**
- **Assigned dock**

4. If dock exists:

- **Display dock as destination location.**

5. If no dock:

- **Standard logic + pop-up message.**

◆ **SECTION 4 — Technical Logic**

ON Support_Scan:

IF support.status = "PREPARED" THEN

order = GET_ASSOCIATED_ORDER(support)

dock = GET_LOADING_DOCK(order)

IF dock IS NOT NULL THEN

DISPLAY dock AS PUTAWAY_LOCATION

ELSE

DISPLAY "No dock associated"

EXECUTE STANDARD_PUTAWAY()

ENDIF

ELSE

STANDARD_PUTAWAY()

ENDIF

◆ **SECTION 5 — Functional Summary (RAG-Optimized)**

What module is impacted?

Forklift Put-away (Cariste Rangement).

When does the logic apply?

When scanning a prepared support.

What does the system check?

Whether the order linked to the support has an associated loading dock.

What happens if a dock exists?

Dock is displayed and proposed as storage location.

What happens if no dock exists?

Standard behavior + pop-up “No dock associated.”

Why is this needed?

To guide operators and ensure prepared supports are placed in the correct loading dock.

◆ **SECTION 6 — Key Functional Conditions**

Condition	System Behavior
Prepared support + dock exists	Display dock as destination
Prepared support + no dock	Standard behavior + pop-up
Non-prepared support	Standard behavior

◆ **SECTION 7 — Client Validation**

AGL acknowledges receipt and validates all elements included in this document.

BK Systèmes commits to delivering the solution that meets the validated requirements within the scope of the approved quotation.

Any additional request or evolution beyond this document may require a supplementary quotation.

Any provision not explicitly stated in this document is not covered and remains at the discretion of the concerned parties.
