

Assignment of a Collect

Purpose:

- **Assign a collect mission to a specific operator for processing in the warehouse.**

Access:

- **Contextual menu in the Generated or In progress tabs of the Collect window.**
 - **Option: Assign to...**
-

Process Steps

1. Open Assignment Window

- **Selecting Assign to... opens a window listing all users registered in SpeedWMS.**

2. Select Operator

- **Choose the operator who will be responsible for processing the collect.**
- **Multiple collects can be assigned to the same operator using multiple selection.**

3. Confirm Assignment

- **The selected collect(s) are now assigned to the chosen operator.**

4. Unassign if Needed

- **If an error occurs or the operator is unavailable, the collect can be unassigned using the Deallocate option in the context menu.**
-

Key Notes

- **Ensures that warehouse staff have clear responsibilities for pick-up missions.**
- **Supports multiple assignments and corrections (unassigning) for flexibility in operations.**
