

Assignment to a Loading

Purpose:

- **Associate selected orders with a SpeedWMS loading for shipment or dispatch.**

Access:

- **Contextual menu after selecting one or more orders in seizure status.**
-

Process Steps

1. Select Orders

- **Choose one or more orders from the order portfolio in status In seizure.**

2. Assign to Loading

- **The system displays a list of loadings in progress.**
- **Select the desired loading code to attach the orders.**

3. Create New Loading (Optional)

- **If needed, a new loading can be created directly from this screen using the New button.**

4. Unassign Orders (Optional)

- **Orders can also be removed from a loading if necessary, using the same contextual menu.**
-

Key Notes

- **Ensures that orders are linked to a physical shipment or load, allowing tracking and proper dispatch.**
- **Supports dynamic management: assigning, creating, or unassigning loadings as needed.**
