

Automatic Launch Overview

Purpose:

- **Automatically organizes, creates, and completes order launches over a period.**
- **Designed for high-volume warehouse management.**
- **Uses BKSystemes' GEX execution management tool for scheduling and execution.**

Access:

- **System / Sequence in SpeedWMS.**
-

Process Steps

- 1. Definition of Sequences (SpeedWMS)**
 - **Configure the sequence criteria for automatic launches in SpeedWMS.**
 - 2. Scheduling Tasks (SpeedWMS)**
 - **Schedule tasks for automatic execution according to defined sequences.**
 - 3. Execution Manager (GEX)**
 - **GEX executes the scheduled launches automatically.**
 - 4. Execution Tracking (GEX)**
 - **Monitor progress, success, or errors of the automated launches via GEX.**
-

Key Notes

- **GEX is a licensed tool required for automatic launch functionality.**
- **Steps 3 & 4 (execution and tracking) are handled entirely in GEX; refer to GEX documentation.**
- **Automatic launch is particularly useful for large-scale operations, reducing manual intervention.**
