

Collect Management Overview

Purpose:

- Optimize the movements of preparers in the warehouse.
- Group samples from multiple orders/missions to pick all required quantities in one trip per location.
- Important: The collect process does not validate mission lines. Stock decrement happens during distribution or packing.

Access:

Preparation / Manage collect mission

Collect Screen Overview

- The window displays all collects, divided by status:

Tab	Description
-----	-------------

Generated	Collects created but not yet started. Default tab on opening.
-----------	---

In Progress	Collects that are currently being executed.
-------------	---

Closed	Completed collects.
--------	---------------------

All	Displays all collects regardless of status.
-----	---

Contextual Menu Options

Option	Functionality	Status Restrictions

Assign to	Assign a collect to a user	N/A

Option	Functionality	Status Restrictions
Deallocate	Remove a user from a collect	N/A
Export to Excel / Configure Screen / View Additional Info	For reporting and display adjustments	N/A

Collect Notes

- For each collect, a collect note can be printed via the Print button on the order bar.
- Provides a summary of the items and quantities to be picked for that collect.

Processing

- Normally handled via the SpeedRadio module (RF devices).
- Can also be executed administratively if needed.

Key Notes

- Collects group multiple orders/missions but do not finalize stock allocations.
- Only Generated collects (010) can be edited or deleted.
- Supports user assignment, organization, and reporting.
