

Launching a Distribution

Access:

Preparation / Distribution

Steps to Launch a Distribution

- 1. Select the distribution(s) you want to process.**
 - 2. Use the contextual menu and choose:
GO: Validate the distributions**
-

What Happens When You Launch

- Orders are generated based on the distribution model.**
 - Orders are automatically validated (depending on configuration).**
 - Picking notes and labels are created for the orders.**
 - Optional: Print a label per recipient or per shipping support using the Print markup labels option.**
-

Notes

- Launching a distribution is the step that converts received goods into prepared orders.**
- Ensures that the distribution is ready for picking and shipping.**
- Labels can be customized per recipient for easier handling.**
