

Order Lines Management

Status Requirement

- **Can only be done when the order is in status: In Seizure (010).**
 - **Orders in other statuses cannot have lines added, modified, or deleted.**
-

Adding Order Lines

- **Multiple methods are available (covered in other sections, e.g., direct entry, templates, import, etc.).**
 - **Must be done while the order is in In Seizure.**
-

Modifying Order Lines

- **Double-click an existing line → opens the line modification screen.**
 - **You can change:**
 - **Item reference**
 - **Quantity**
 - **Any other editable attributes for that line**
-

Deleting Order Lines

- **Right-click on the line → select Delete from the contextual menu.**
 - **Only possible in In Seizure status.**
-

Reordering Lines

- **Use the up/down arrows on the right side of the window.**
 - **Allows adjusting the display order of lines in the order.**
-

Summary:

- **Add / Modify / Delete / Reorder lines → only in In Seizure status.**

- **Ensures the order lines are fully prepared before moving to wave or preparation stages.**
