

Orders Management

Access

- **Menu: Preparation → Orders**

Purpose

- **Provides a portfolio of all orders in SpeedWMS.**
 - **Orders are organized into tabs based on their status.**
 - **Default filter: Creation date in a specific viewing period.**
 - **Filters can be customized by:**
 - **Creation date**
 - **Preparation date**
 - **Delivery date**
 - **Printing date**
 - **Wave release date**
 - **Modification date**
-

Order Status Flow

Status Name	Status Code	Description
In Seizure	010	Initial status after creation (manual or interface). No preparation mission yet.
In Wave	020	Order associated with a preparation wave but not yet launched. No preparation mission yet.
Preparing	030	Order has been launched in preparation. One or more preparation missions exist. Direct debits may be associated.
Validated	040	All preparation missions are complete. All expected direct debits validated (complete, partial, or missing).
Balanced	050	Special status; no dedicated tab. Used for internal tracking.
Dispatch	060	Optional step; used after packing to check prepared supports.

Status Name	Status Code	Description
Shipped	070	Confirms goods departure. May be associated with a load depending on processes.

- **All Tab: Displays all orders regardless of status.**

Additional Notes

- **Orders and order lines can have miscellaneous operations scheduled at any stage.**
- **These operations can be created directly from the order window or a specific order line via the contextual menu.**
- **See the Miscellaneous Operations section for details on creating and managing these tasks.**
