

Other Order Information (Appendix Tabs)

Beyond the header and line details, SpeedWMS allows you to manage additional information for each order using appendix tabs.

1 Comments Tab

- **Purpose:** Record comments related to the order.
 - **Output:** Comments will appear on:
 - Preparation slips
 - Delivery slips
-

2 Wave Tab

- **Purpose:** View the preparation wave the order belongs to.
 - **Notes:**
 - Orders in the entry/input stage are not yet attached to any wave.
 - Once in a wave, the tab shows wave details for tracking.
-

3 Footer Tab

- **Purpose:** Displays quantitative information of the order, including:
 - Quantities ordered
 - Weights
 - Volumes
 - **Dynamic update:** These fields update automatically as the preparation and shipping processes are executed.
-

4 Info Tab

- **Purpose:** Provides load-related information for the order.
- **Details:**
 - Load(s) the order may be attached to

- **List of media prepared for the order and expected on the load**
-

5 Additional Info Tab

- **Purpose:** Hold extra information about the selected order line.
 - **Flexibility:** Can be used for special notes or internal references not covered in other tabs.
-

 **Tip:** These tabs allow you to centralize all relevant order details, making tracking, reporting, and wave management easier.
