

Order Templates

Purpose

- **Allows you to quickly add predefined sets of order lines to an order.**
 - **Saves time by reusing commonly ordered items or standard combinations.**
-

Access

- **Go to the Lines tab of an order.**
 - **Open the context menu → select Order Templates.**
-

Process

- 1. A list of configured templates appears.**
 - 2. Select the desired template.**
 - 3. Specify the quantity to process.**
 - 4. Click Import → the order lines from the template are added to the order automatically.**
-

Creating New Templates

- **Can be done directly from order lines:**
 - **From scratch: manually define the lines.**
 - **From an existing order: use the current order as the basis for the new template.**
-

In short:

- **Templates = reusable sets of order lines**
- **Add quickly → Save time → Reduce errors**
- **Can create new templates from existing orders or manually.**
