

Creation of the packaging types

To be able to manage the devices in the application, devices and device accounts must first exist in the environment and be configured.

Access: Packagings tab / Packaging types :

Code	Designation	Price (EUR)	Comments	Picture
EUROPAL	Euro pallet	8.00		
ROLL	Roll	120.00		
BIN001	BIN 001	5.00		
BIN002	BIN 002	6.00		

The list of existing packagings in the environment appears, specifying the following information:

- The code of the type of apparatus
- Its designation
- Its price (in currency according to settings)
- Any comments
- An image (if existing)

This information is part of that requested during the creation of a type of apparatus.

Access: Click on the add button :

Packaging type ✖ ✔ **Packaging type : BIN001**

☐ Characteristics

☒ Additional info.

Code: BIN001

Designation: BIN 001

Price (EUR): 5.00

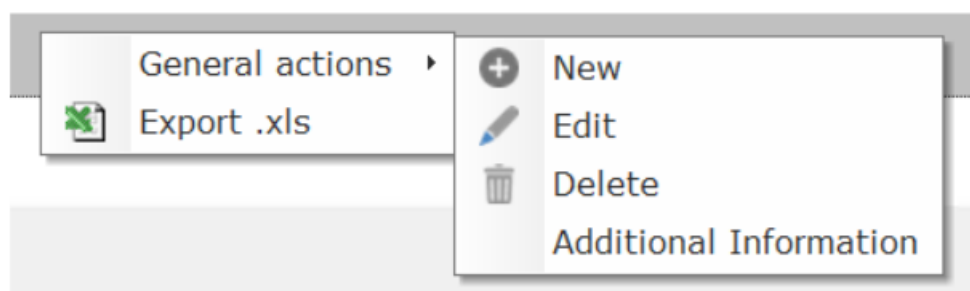

Comments:

In the creation form of an apparatus type, the *Additional info* tab allows you to add additional information.

The validation of the information entry allows to create the type of apparatus and to add it to the already existing list.

The context menu also allows to:

Export the list of apparatus types to Excel.

- Modify a type of apparatus
- Delete an apparatus type, provided that it does not exist in the apparatus/equipment account relationships, nor in the apparatus movements.
- View additional information for a type of apparatus.
