

SOP Section: Stock Generation from Receipt Lines

Sensitivity: Internal

1. Purpose

This procedure defines how to generate stock from receipt lines in Speed WMS and make the goods officially available in inventory.

2. Principle

- **Receipt lines are not immediately available in stock after being created.**
 - **Stock generation is required to:**
 - **Consume associated expected items**
 - **Create stock entry movements**
 - **Make the storage media available in logistics flows (picking, sampling, etc.)**
-

3. Stock Generation Status

Each receipt line has a Top Stock Input field indicating stock generation status:

Value Meaning

- | | |
|----------|---|
| 0 | Line added to receipt but not generated in stock. No movement is created; goods cannot be used in logistics. |
| 1 | Line generated in stock. Entry movement created; expected items consumed; goods available for logistics flows. |
-

4. Preparing Stock Generation

- 1. Open the Receipt Form**
 - 2. Select the lines to be processed**
 - **Use Select All button for convenience if processing all lines**
 - 3. Confirm the receiving dock location on the receipt header**
-

5. Executing Stock Generation

1. Click the Generate Stock button
 2. Speed WMS will:
 - Create stock entry movements for each line
 - Consume associated expected items
 - Update Top Stock Input from 0 → 1 for processed lines
-

6. Post-Generation Handling

6.1 Support Status

Generated supports are assigned a status code that determines availability:

Status Code	Meaning
01	Support in place, immediately available for picking or sampling
02	Support awaiting placement, not available for order preparation until moved to location

6.2 Modification Restrictions

- Once a receipt line is generated in stock:
 - It cannot be modified or deleted
 - It remains visible under the Storage tab of the receipt form
-

7. Summary Flow

Receipt Lines Created (Top Stock Input = 0)

Select Lines for Generation

Generate Stock Button

Entry Movements Created → Expected Items Consumed

Top Stock Input = 1 → Supports Available in Stock

8. Key Controls

- **✓ Only lines with Top Stock Input = 0 can be generated**
- **✓ Stock generation consumes expected items automatically**
- **✓ Generated lines cannot be deleted or edited**
- **✓ Support status determines whether stock is immediately usable**
