

SpeedWMS – Quality Assignment

Access

- **Menu: Stock / Quality allocation**
-

Purpose

- **Applies quality rules to stock items according to the configurations defined in the environment.**
 - **Ensures that stock in the warehouse is assigned the correct quality status based on pre-configured rules.**
-

Notes

- **The quality rules are defined at the item level in the settings.**
- **This process helps maintain consistency in stock quality and prevents misallocation during picking or replenishment.**
