

Declarative Storage – Assigning Planned Locations

Access:

- **Open a Reception form → Use the Assign option from the popup/context menu.**
-

Purpose

- **Assign a destination location for each support manually.**
 - **Supports can then be prepared for storage movements and later used for order picking.**
-

Steps

- 1. Open the reception form.**
 - 2. Select a line (support) → choose Assign from the contextual menu.**
 - 3. Fill in the Planned location field for each support:**
 - **Enter the location name manually, or**
 - **Search and select via the Assign the planned location option.**
-

Outcome

- **As soon as a destination location is assigned, the support's status changes to 03 ("movement to be performed").**
- **This indicates the support has a known planned location and is ready for storage processing.**
