

Speed WMS – Internal Support Reference Guide

Sensitivity: Internal

System: Speed WMS

Audience: Support / Technical / Operations

1. User Access & System Support

Giving a New User Access to Speed

Contact Person: Alan Bezuidenhout

Required Information:

- Windows URL
 - Email Address
 - Active Directory (AD) Account
-

Network Issues on Speed

Contact Persons:

- Moses Lengoabala
- Tebogo Masemola

Use this escalation path when users experience:

- Connectivity issues
 - Slow system performance
 - Inability to log into Speed
-

Adding a New Account (Folder / Country)

Contact Person: BK System

2. Support Status – Inbound

Status Description

001 In Place

Status Description

100 To Store

200 Closed

3. Stock Classification

Class Description

A Active locations – Fast-moving products (Bulk Storage / Pick & Pack)

B Racking – Seasonal-moving products

C Slow-moving products

4. Picking Sequence

- **Snake Shape**
 - Pick Phase
 - Reach Truck Picking
 - Replenishment from top to bottom
 - **ZigZag Shape**
 - Pick Phase
-

5. Stock Rotation Rules

- **FIFO:** First-In, First-Out
 - **LIFO:** Last-In, First-Out
 - **Production Company Logic:**
 - Production Date determines outbound processing
 - Best Before Date (BBD) is taken into account
-

6. Customer & Third-Party Management

Adding a New Customer Account

Mandatory Information:

- Address
 - Prefix
-

Third Party Types

Type	Code
Supplier	001
Carrier / Transporter	002
Recipient	003

Mandatory Fields:

- Customer Account
 - Third Party Code
 - Third Party Name
 - Third Party Type
 - Address
-

7. Receiving & Dock Rules

Receiving Dock

- Picking is **not allowed** on receiving dock locations
- Exception: **Cross-Docking**

Cross-Docking

A Just-In-Time logistics practice where goods move directly from inbound to outbound without storage.

8. Zones & Locations

Zone Type

- Picking Area → Replenishment
- Replenishment → Restoring stock levels

Location Search Rule

- **Rule Name:** RECH_EMP_STRUCTURE
 - **Description:** Search within location structure
-

9. Item Master Data (New Items)

Mandatory Fields

- Customer Account
 - Item Code
 - Long Description
 - Batch Managed (1 = Yes, 0 = No)
 - Classification (Isling: 1–4)
 - Serial Managed
 - Third Party Code
-

10. Preparation & Picking

Preparation Sequence

Orders must be:

- Picked
 - Completed
 - Closed **per location**, before moving to the next
-

11. Inbound / Receiving

Master Data Coding

- Receipt: 001
- Returns: 100

Mandatory Fields

- Customer Account
- Third Party Code

- Receipt Date
- Receiving Dock
- Contractor Reference
- Batch (if managed)
- Best Before Date (if managed)
- Serial Number (if managed)

Location Type

- Planned location must be associated with **Storage Area**

12. Reception Status (Returns)

Status Description

001 In Progress

100 Stored

200 Closed

13. Global Settings

Receiving Information

- Store before closing → Receiving Dock
- Storage after closing → Planned Location

Additional Information

- **Global Information:** Applies to all customer accounts
- **Variables Information:** Activity-specific, can vary by customer

14. Inbound Template Import

- Ensure the Excel file is **saved and closed** before importing into Speed

15. Stock Management

Stock Modification

- Requires **Reason Codes**
- Reason Codes are created under:
 - Global Settings → Modules → Stock

Support Number

- Auto-generated if not provided in dataloader
 - Used for full stock traceability
-

16. Order Preparation

Order Statuses

Status Description

010 In Seizure

020 In Wave

030 Preparing

050 Validated

060 Packed

070 Shipped

Order Types

- Preparation
 - Replenishment
 - Countermark
 - Cross-stock
-

17. Mission Lines

Status Description

010 To Prepare

Status Description

030 In Progress

040 Validated

050 Terminated

18. Loading

- Investigate **Grouping Support Number** issues when loading errors occur

19. Item Code Updates

View Item

```
SELECT *  
  
FROM ART_PAR  
  
WHERE ACT_CODE = 'Activity Code'  
  
AND ART_CCLI = 'Customer Account';
```

Update Item

```
UPDATE ART_PAR  
  
WHERE ACT_CODE = 'Activity Code'  
  
AND ART_CCLI = 'Customer Account'  
  
AND ART_KEYU = 'Item KEYU';
```

Important:

If stock already exists, you must also update:

- Movements
- Stock
- Reception Lines

20. Reception Line Update

```
SELECT *  
  
FROM REL_DAT
```

WHERE ACT_CODE = 'Activity Code';

UPDATE REL_DAT

SET ART_CODE = 'Updated Item Code'

WHERE ACT_CODE = 'Activity Code'

AND ART_CODE = 'Current Item Code'

AND ART_KEYU = 'Item KEYU';

Definitions:

- ART_CODC → Actual Customer Item Code
 - ART_CODE → Prefixed Item Code
 - REL_DAT → Reception Line Table
 - REL_SSUP → Storage Support Status
-

21. Location / Zone Updates

SELECT *

FROM EMP_BAS;

UPDATE EMP_BAS

SET EMP_ZONE = 'Updated Area'

WHERE EMP_KEYU = 'Location KEYU';

22. Updating Reception Status

UPDATE REE_DAT

SET REE_ETRE = '100'

WHERE REE_NoRE = 'Reception Number'

AND ACT_CODE = 'Activity Code'

AND REE_KEYU = 'Reception Header KEYU';

 Warning:

Do **not** update inbound stock directly via DB unless absolutely necessary, as it will require deleting:

- Stock
- Movements
- Reception Lines

23. Orders – Reversal from Shipped (070)

Revert Order to Packed

```
SELECT *  
  
FROM OPE_DAT  
  
WHERE ACT_CODE = 'Activity Code'  
  
AND OPE_NOOE = 'Order Number';
```

```
UPDATE OPE_DAT  
  
SET OPE_STAT = '060'  
  
WHERE ACT_CODE = 'Activity Code'  
  
AND OPE_NOOE = 'Order Number';
```

Important Process Notes

- After reverting to **Packed (060)**:
 - Continue actions **in Speed**, not SQL
 - Move order back to **Validated**
 - Then to **Preparation**
 - Then to **Seizure (010)**

 Only at **Seizure** can the order be modified or deleted.
