

LPNs Missing on Manifest – Temporary Resolution

Sensitivity: Internal

System: Speed WMS

Module Impacted: Manifest / ETAT

Audience: Support / Technical Team

Issue Description

Operations reported that **some LPNs do not appear on the manifest.**

Investigation shows that in certain cases:

- LPN data from MIL_DAT does **not fully pass** into SEX_DAT
- The affected record in SEX_DAT has a **missing order number**:
 - SEX_NOOE = 0
- Since the manifest ETAT relies on SEX_DAT, the LPN **does not display on the manifest**

 The **root cause is currently unknown.**

The steps below provide a **temporary fix** when the issue occurs.

How to Identify Affected LPNs

Run the following query to find LPNs where the order number is missing:

SELECT

sex.SEX_SUPE,

mil.MIL_SUPP,

mil.OPE_NOOE,

mil.MIE_NOMI,

sex.SEX_NOMI,

sex.SEX_NOOE

FROM SEX_DAT sex

JOIN MIL_DAT mil

ON mil.ACT_CODE = sex.SEX_ACT

```
AND mil.MIE_NoMI = sex.SEX_NoMI  
AND mil.MIL_SUPP = sex.SEX_SUPE  
WHERE sex.SEX_ACT = 'RSAJHBCLA'  
AND sex.SEX_NOOE = '0';
```

Interpretation

- Records returned indicate **LPNs that will not appear on the manifest**
 - The issue is caused by a missing SEX_NOOE value
-

Temporary Fix: Update Missing Order Number

If records are found with SEX_NOOE = 0, update them by pulling the correct order number from MIL_DAT.

```
UPDATE sex_dat  
SET sex_nooe = mil.ope_nooe  
FROM sex_dat sex  
JOIN mil_dat mil  
ON mil.ACT_CODE = sex.SEX_ACT  
AND mil.MIE_NoMI = sex.SEX_NoMI  
AND mil.MIL_SUPP = sex.SEX_SUPE  
WHERE sex.SEX_ACT = 'RSAJHBCLA'  
AND sex.SEX_NOOE = '0';
```

Expected Outcome

- SEX_NOOE is populated with the correct OPE_NOOE
 - The LPN correctly reflects on the manifest
 - Manifest ETAT functions as expected
-

Important Notes

- This is a **temporary workaround**, not a permanent fix

- Execute only when the issue is confirmed
- Database updates must be performed by **Support**
- Monitor recurring cases to assist with root cause analysis
