

Procedure: Check if a Manifest Was Shipped (Speed Admin)

1. Objective

To verify whether a manifest has been shipped in Speed Admin and, if required, manually ship the manifest to ensure all linked orders are correctly updated.

2. Procedure

Step 1 – Log in to Speed Admin

- Access the Speed Admin system using your authorised credentials.
-

Step 2 – Navigate to the Shipping Module

- From the main menu, select Shipping Module.
-

Step 3 – Open Loading Management

- Within the Shipping Module, click on Loading Management.
-

Step 4 – Review Status Tabs

Under Loading Management, the following status tabs are available:

- Created
 - In Progress
 - Loaded
 - Shipped
 - All
-

Step 5 – Check the “Shipped” Tab

- Search for the manifest in the Shipped tab.
 - If the manifest appears here → The manifest has already been shipped.
 - If the manifest does not appear here but is found under “Loaded” → The manifest has not yet been shipped.

Step 6 – Ship the Manifest (If Required)

If the manifest is still in Loaded status:

- 1. Right-click on the manifest entry.**
 - 2. Select Ship.**
 - 3. The manifest and all linked orders will move to Shipped status.**
-

3. Notes

- Always confirm the manifest status before performing any action.**
- Shipping the manifest updates all associated orders automatically.**
- Ensure you have the correct authorisation before shipping a manifest.**
- If unsure, verify with the operations or planning team before proceeding.**
